

Consistently perfect milk, with innovative dispensing.

At Riverina Fresh™, we want to provide your customers with the best coffee experience with our consistently great milk.

Choosing the right milk is an important decision. With 95% of Australians enjoying a milk based coffee drink, your choice of milk brand has the ability to impact the quality and consistency of the coffee that you serve to your customers every single day.

We want the coffee you serve to your customers to be consistently good to keep them coming back to your café. That's why we have our Full Cream, Light and Skim milk available in convenient 2L bottles as well as 10L bags for The Juggler café milk tap system.

Trust the consistent performer

RIVERINA SOURCED

Our dairy farms are all located in the Riverina region, NSW.

DEDICATED FARMS

Sourced from the same dedicated group of farms every day.

CONSISTENT QUALITY

A smooth, full bodied award winning milk.

PRECISE MILK

Carefully monitored at every stage of the process.

BARISTA TESTED

Trained baristas on site to ensure optimum café milk quality.

About The Juggler café milk tap system

The Juggler is a milk dispensing system designed for cafés. It speeds up service, reduces waste and helps you focus on what really matters; the coffee and the customer.

Increase productivity

The Juggler is fast to load, intuitive to use and easy to clean. It helps streamline the coffee making process and speeds up service. Time-saving features include hands-free volumetric dosing which means less time is wasted opening, pouring from and crushing empty milk bottles.

Reduce milk waste

Volumetric dosing can dramatically reduce the amount of milk otherwise wasted when pouring from bottles. The Jug Size Sensor allows you to set dosing programs to match the size of cups you use and your most common combination of coffee orders.

Show you care

Customers notice The Juggler. It represents true commitment to the quality of the coffee you serve (cold milk textures better than milk from a bottle left out on the bench) and the environment (by reducing the amount of plastic and milk you waste).
